

# Respiratory Illness Report - Week ending December 21, 2024

Published December 27, 2024

## Overview

**Influenza:** Nationwide, seasonal influenza activity continues to increase across the country. In Utah, influenza-like illness (ILI) and influenza hospitalization trends continue to increase, but overall severity is still low. In Davis County, ILI activity increased from minimal to low severity.

**COVID-19 Wastewater Surveillance:** As of December 19, viral concentrations of SARS-CoV-2 in wastewater increased in Davis County. The Central Davis site (Kaysville/Farmington/Fruit Heights area) is in the Watch category and the remaining three sites in the county are all in the Elevated category. Explore statewide wastewater surveillance data at <https://avrpublic.dhhs.utah.gov/uwss/>.

## Influenza-Like Illness

Graph 1 displays the weekly percentage of outpatient visits due to influenza-like illness (ILI). For comparison, the dashed line shows the previous 5-year average (2019-2023) of ILI activity. This week's ILI rate was 3.8%.

Graph 1. Percent of Outpatient Visits due to Influenza-Like Illness, by Week, Davis County, Utah

## School Absenteeism

Graph 2 displays the weekly percentage of elementary school absenteeism in Davis School District. For comparison, the dashed line shows the absenteeism rate of the previous 5 school years (school years beginning 2019-2023). This week's absenteeism rate is unavailable.

Graph 2. Percentage of Elementary School Absenteeism, by Week, Davis School District, Utah

# Emergency Department Visits

Graph 3 displays the rolling 7 day average of the percent of emergency department (ED) visits due to COVID-19, influenza, and respiratory syncytial virus (RSV). These data are obtained from syndromic surveillance and only consider the diagnosis discharge codes for each condition. Table 1 presents two data points for each virus: the current trend of ED visits (increasing, decreasing, or no change), and the percent of ED visits due to each during the currently reported week.

Graph 3. Percent of ED Visits due to COVID-19, Influenza, & RSV, Rolling 7-day Average, Davis County, Utah

Table 1: Recent Trends of ED Visits, Davis County, Utah, for Week Ending Dec 21, 2024

Virus	Trend	Percent of ED Visits
COVID-19	Increasing (last 14 days)	1.3 %
Influenza	Increasing (last 14 days)	2.8 %
RSV	Decreasing (last 14 days)	0.2 %

# Hospitalizations

Graph 4 displays the weekly number of hospitalizations due to COVID-19 and influenza.

Graph 4. Number of Hospitalizations due to COVID-19 & Influenza, Davis County, Utah
